## **DPT Laboratories Improves Efficiencies with Legiant Timecard™**

### ***Company to Expand Solution Enterprise-Wide***

LAS VEGAS--(BUSINESS WIRE)--Legiant, a leading provider of web-based workforce productivity solutions, announced today at the Society for Human Resource Management (SHRM) 59th Annual Conference & Exposition that DPT Laboratories, Ltd. (DPT) will expand its Legiant time and attendance system across the enterprise based on a recent analysis of cost savings and the resulting efficiencies gained by the system.

DPT, a Contract Development and Manufacturing Organization (CDMO) for the world's leading pharmaceutical, biopharmaceutical and consumer companies, replaced its time and attendance system for its 500 hourly employees with Legiant Timecard™. DPT identified a minimum of \$30,000 in annual savings due to improved accuracy and reduced time spent calculating and processing time cards. The company recently announced that it is expanding the system.

"The system is extremely user-friendly and it was easy to rollout to our employees," said Phil Geisler, director, Information Management. "It is intuitive to use, our employees like it, and have adopted the new process quickly."

Upon the implementation of the Legiant system, DPT was better able to manage attendance and punctuality. According to the company, it has allowed them to more efficiently manage their number one asset, employees. The system provides DPT with the tools to accurately manage the deployment of their employees.

"The system has allowed us to reach out to our employees to ensure we are responding quickly to their requests for time off," said Angela Saunders, senior compensation and benefits administrator. "Through the increase in efficiency the Legiant system has provided, we believe it has more than paid for itself."

Legiant Timecard™ enables companies to dramatically reduce payroll preparation time and eliminate costly payroll errors while at the same time delivering vital business intelligence to both HR executives and financial managers. The system enhances the flow of critical workforce information and uses a single screen to provide real-time attendance data, timecard approval status, electronic in-out board, messages, and leave request approval status.

Said Walter Ross, president and CEO of Legiant, "We are proud to have been a partner of DPT for so many years and are pleased to learn that the company continues to save money and enhance workforce productivity with our time and attendance system. Companies should expect to see results immediately from an automated approach to workforce management and savings should continue. DPT's experience proves that."

### **About Legiant**

Legiant is a leading provider of web-based time and attendance and time accounting systems for payroll, attendance, productivity, leave and project tracking. Flexible productivity time tracking solutions help Legiant's enterprise customers maximize the profitability and productivity of their workforce. Solutions such as Legiant Timecard™ and Legiant Express™ can be customized to meet the unique needs of any organization including mobile workforce tracking, payroll automation or automated time and attendance and workforce productivity reporting. Legiant integrates software, hardware, and professional services to create a comprehensive accounting solution, easy-to-use and accessible from anywhere through a Web-based interface.
