Legiant Unveils Timecard Version 10 - The Next Evolution in Workforce Management

AUSTIN, Texas – December 10, 2005 – Legiant, a leading provider of automated Time and Attendance solutions, today released Legiant Timecard Version 10. The latest release is a more powerful, feature-rich version of Legiant’s flagship Timecard product, and delivers the most comprehensive self-service, scheduling, leave requests, workflow, time accounting and ad hoc reporting features available.

Legiant Version 10 was developed using Microsoft .NET to ensure scalability, zero-footprint architecture to eliminate installation on individual workstations, and 100% managed code to boost performance and security.

Version 10 has also adopted XML API technology which allows Legiant to deliver the most robust Time and Attendance integration capability in the industry. This flexibility allows Version 10 to operate within any environment and easily integrate your most valuable labor and human capital information systems to create an enterprise-wide solution.

The layout of Version 10 has been enhanced to provide easier navigation and increase the flow of critical workforce information. The new Manager’s Dashboard uses a single screen to provide real-time attendance data, timecard approval status, electronic in-out board, messages, and leave request approval status.

Legiant Timecard accommodates exception pay, project tracking, hourly employees, exempt employees and salaried non-exempt employees. Version 10 was built for more than just collecting, processing and integrating payroll-related data; it was built to provide complete visibility of your entire workforce.

Version 10 also features:

- An intuitive user interface that facilitates employee self-service, workflow, and flexibility.
- The latest “Push technology” that delivers up to the minute information to the correct person, automatically.
- An internal report writer that can access all data in real-time and allows any user to customize it into targeted, easy-to-read reports.

“Our recipe for sustaining growth and retaining customers is simple,” explained Gina Ross, President of Legiant, “We create solutions that build on our proven core functionality, we incorporate leading edge technology, and we ask our clients to help guide us by explaining their true business needs. One overwhelming request we have responded to is the need to replace individual systems deployed for hourly, salaried and exempt personnel with a complete solution that has strong workflow and notification capabilities.”.

Legiant’s recipe seems to be working. Sales have doubled every year and their customer retention rate is at a solid 98%. For a complete overview of the Legiant Timecard Version 10 visit: www.legiant.com/V10
