Legiant Partners with Fulcrum Biometrics to Offer Virtual Punch Clock

AUSTIN, TX – August 2, 2010 – Legiant, a leader in workforce management software, announced their partnership with Fulcrum Biometrics to release a cost-effective biometric solution for time and attendance. Fulcrum Biometrics has developed FbF Timeclock, a virtual punch clock application that integrates seamlessly with Legiant Timecard software. FbF Timeclock utilizes a USB fingerprint scanner and the Fulcrum Biometrics Framework to provide Legiant customers with a low-cost biometric solution.

“Many organizations understand the benefits of biometric solutions, but finding an affordable, enterprise-class time and attendance system with biometrics can be difficult,” said Rod Crane, CTO of Legiant. “By partnering with Fulcrum Biometrics, Legiant can meet the needs of organizations that were previously unable to take advantage of biometrics to eliminate buddy-punching.”

FbF Timeclock transforms a laptop, PC or kiosk into a biometric time clock. In a few seconds, an employee’s fingerprint is scanned, identified and then automatically punched in or transferred to another department. When the application is minimized, the workstation can still be used for other tasks while accepting employee punches. Once an employee has enrolled, the employee can punch in or transfer at any workstation that has been setup with FbF Timeclock. For additional information about FbF Timeclock, visit www.legiant.com/products/fingerprint.htm.

For over a decade, Legiant has been leading the way in the time and attendance industry with features like zero-footprint installation, automatic workflow notifications and web-based solutions. Legiant continues to break new ground by integrating with the most effective devices available, making previous time tracking solutions obsolete.

About Fulcrum Biometrics

Fulcrum Biometrics is a leading international provider, distributor and integrator of multi-biometric identification systems and biometric devices. The company's offerings include industry leading biometric software development tools, fingerprint scanners and other biometric sensors. Fulcrum

Biometrics also provides custom integration and biometric software development services for all types of identity management applications such as access control, network login and membership management systems.

About Legiant

Legiant is a leading provider of web-based time and attendance software for payroll, attendance, productivity, leave and project tracking. Flexible time and attendance tracking solutions help Legiant's enterprise customers maximize the profitability and productivity of their workforce. Solutions such as Legiant Timecard™ and Legiant Timecard Express™ can be customized to meet the unique needs of any organization including mobile workforce tracking, software-as-a-service and real-time reporting. Legiant combines software, hardware, and professional services to create a comprehensive time tracking solution, easy-to-use and accessible from anywhere through a Web-based interface. Legiant integrates with the majority of payroll systems and supports biometric data collection devices.
