

Legiant Hosting Options

With Legiant you have the option of hosting your time and attendance solution within your network or allowing us to host it for you at our datacenter. There are strong arguments for both hosting options, and determining the best fit is an exercise in aligning IT resources with organizational goals.

In-House Hosting

Companies that chose to host in-house are in complete control of their maintenance, security, management, and connectivity – and that is just the way they like it. These companies generally have an IT infrastructure in place, but even those without large IT departments can host Legiant Timecard with the confidence of the industries best support behind them.

Some other benefits of In-House Hosting include:

The application can be restricted to your internal network (Intranet): Some clients do not want to provide internet access to their employees, and others don't want the system to be accessed from outside the company.

Direct Database Access: Allows access to database information for additional uses, including additional report writers and the ability to extract data beyond the standard reports and exports.

Faster Return on Investment: By purchasing the Legiant Timecard, you will compress your ROI cycle by owning rather than renting the application.

Active Directory (or LDAP) Authentication:

- Removes the requirement of having separate passwords to use and to maintain.
- Provides additional security of your existing password strength and age requirements.
- Eliminates the frustrations and the help calls from employees that have forgotten their passwords.

Legiant Hosting

Allowing Legiant to manage your hosting experience will enable you to focus on your core business activities. By using the Software as a Service (SaaS or ASP) model, your system will be hosted in a secure datacenter. All of our experience and resources will become your assets, and with one recurring rental fee we will cover all IT support, Software Licensing, hardware, hosting, and upgrades.

With only a Web browser and a persistent Internet connection you can:

- Outsource all IT responsibilities
- Significantly reduce your investment in hardware and IT personnel
- Minimize delays and disruptions resulting from installing, maintaining and upgrading a system
- Access our state-of-the-art, secure server and manage your data at a low cost of entry
- Enhance the value of your investment. Legiant is committed to providing the latest technologies for managing and securing your data.
- Enjoy peace of mind knowing that your data is being backed up nightly and archived weekly offsite
- Simplify your expenses with a predictable monthly payment for using Legiant Timecard
- Provide remote access to your Legiant Timecard System

Changing Hosting Solutions

If your business needs ever change Legiant is able to provide a seamless migration from an SaaS/ASP to an in-house solution. Just contact your product specialist for more information.
